

Heater (LPG)

1. Put the heater with holder (1) to dashboard in such a way that after shutting the door, lower glass is not hitting heater valve. Then mark assembly holes on OHG.
2. Drill $\text{\O}11$ holes and put M8 rivet nuts. Attach the heater using M8x20 screws (2) .

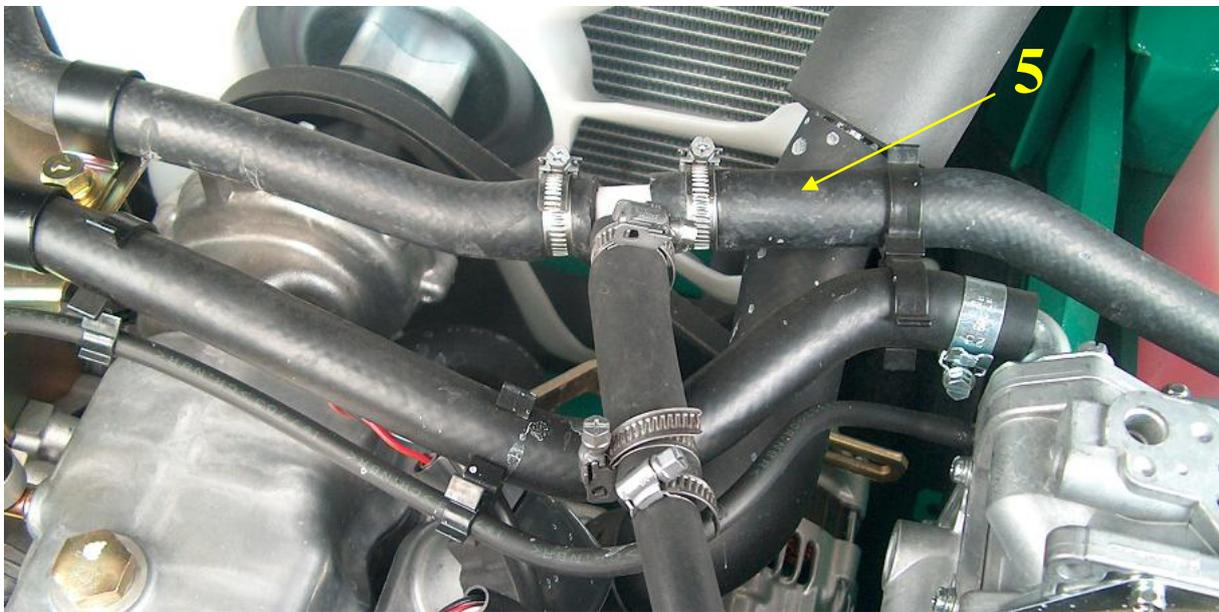

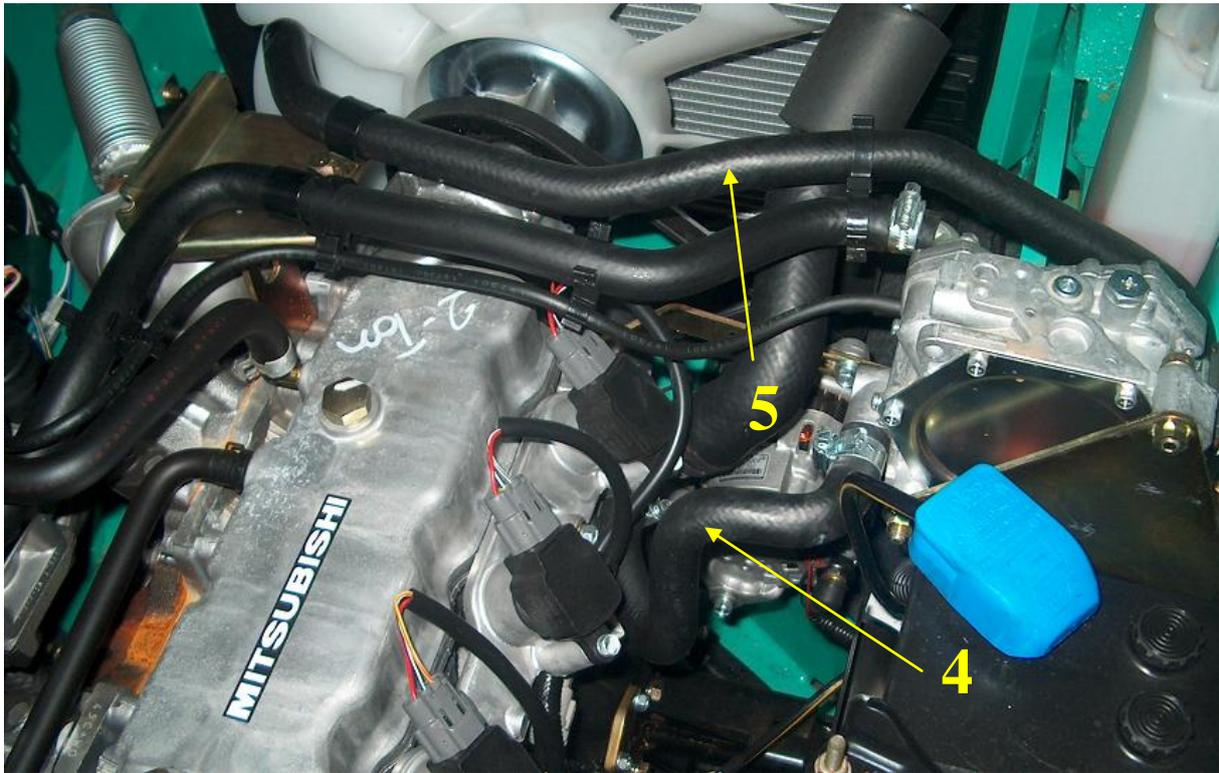

3. Attach hoses to heater outlet/inlet and tight them up using clamps.
4. Plug in electric harness

5. Take floor panel off and cut off 40 x 40 mm square in the corner (3)
6. Run hoses through the hole (3).

7. Cut hoses (4) and (5) into 2 pieces. Attach heater inlet hose to cut hose no (4) and heater outlet hose to cut hose no (5).

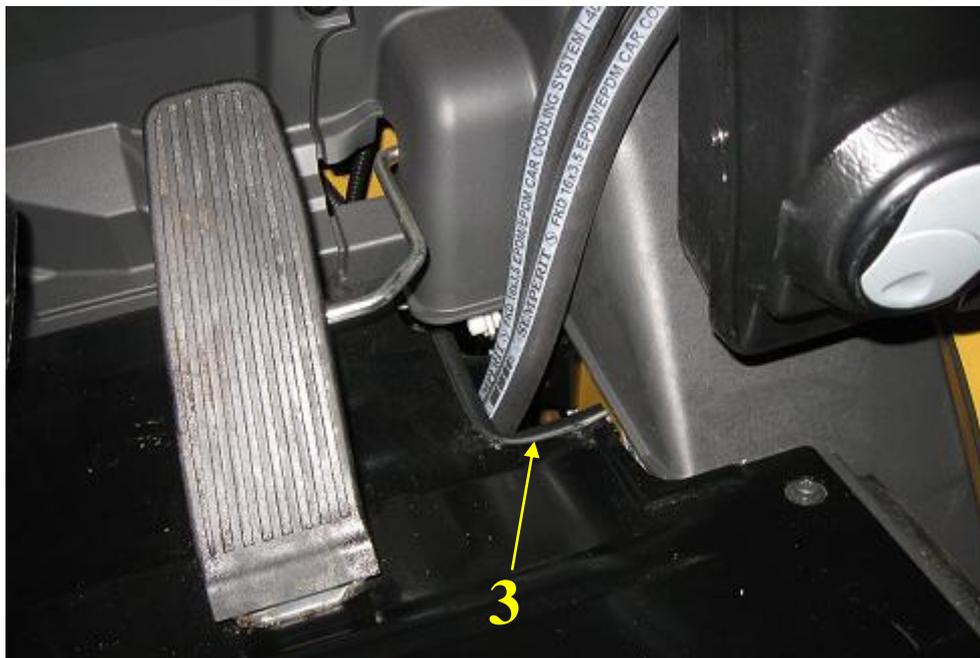

Heater (diesel)

1. See point 1. Heater LPG
2. See point 2. Heater LPG

3. See point 3. Heater LPG
4. See point 4. Heater LPG

- 5. See point 5. Heater LPG
- 6. See point 6. Heater LPG

7. Attach heater inlet hose to engine outlet (4)

6. Attach heater outlet hose to engine inlet (5)
